

November 12, 2025: On the Continuing Monitoring and Acoustic Response to Legal Writings

At 7:01 a.m., I completed the work on our private legal writings which included the printing of the documents for presentation to the court later today.

At the exact moment that I completed the printing of all of the documents, the event was marked by a vehicle driving past our house.

This is a common-place event that occurs to 'prove' the existence of live-monitoring of my home at all hours of the day and night.

There is a persistent and consistent effort by the spying team to indicate its spying operation to me, personally, by 'marking' the beginning and ending of events with an indication noise.

(Another car drives nearby now to affirm the feedback loop.)

In conclusion, I am writing this as a documentation of the continuing live-monitoring of my personal and professional legal work by a spying team that began with the Presidential campaign of the un-named candidate and has continued to express itself to this very day.

My legal work is being illegally monitored by a team of people that are 'above the law' at this time and there is no legal remedy by which I can currently hold them accountable.

This is abuse from our government for the purpose of preventing the filing of a civil lawsuit to hold them accountable. This is a continuing extension from the man with a gun that confronted my on August 08, 2024 to enforce the same message to me: 'if you file a lawsuit against us, we will cause you personal harm.'

This is a first-degree felony in Texas.

Loud aircraft are now flying overhead to instill in my personal belief the 'high powers' that are pressing themselves over my home to oppress me.

(This is my ongoing recording of these events for the future filing of a lawsuit once this person has been removed from office.)

(I am now experiencing sirens in the near distance which has been a repeating effect to 'echo' that I am speaking of criminal activity. A vehicle has passed our home now.)

(As is being evidenced to me, the 'high powers' that are oppressing my home have control over our local police department and use those local police as props in their campaign of terrorism against me.)
